Projects:

Projects > All > IB SGC - the main project

Projects > Archived > Edukate - original paid template, don't edit, keep for remix if smth breaks

Projects > Archived > * - old stuff (unused templates, components, etc..), can delete

IB SGC:

Draft pages (marked with "draft" label/pill) - copied from template, currently unused

CMS collections marked with "[template]" - copied from template, currently unused

CMS - Documents, News, Gallery

Calendar - EventsCalendar plugin, Google calendar managed by Babic, requires paid plan to auto-update/sync, currently needs to be synced manually

TODO:

- Add links to social media icons (currently point nowhere)
- Switch everything to CMS for easier management (e.g.: DP/MYP programme descriptions, etc..)
- Add file upload component to contact/apply forms so users can submit applications directly through the website instead of email
- Gallery: zoom/open image
- Documents x Admissions: documents in 2 pages -> chaotic for users, complicated for CMS management -> improve
