Assessment philosophy

The assessment philosophy of the International Baccalaureate Diploma Programme is grounded in the principles of fairness, transparency, and the support of student learning. Assessment is designed not only to measure achievement but also to promote deep understanding, critical thinking, and the development of skills outlined in the IB learner profile. A balanced approach is used, combining formative assessment to guide learning and provide meaningful feedback, with summative assessment to evaluate achievement against clearly defined criteria. All assessment practices are criterion-related, ensuring consistency and objectivity, and are aligned with IB standards and subject-specific requirements. The school is committed to ensuring that assessment processes are clearly communicated to students and parents, applied consistently across subjects, and regularly reviewed to maintain their validity, reliability, and fairness.

Aims and Objectives:

- The objectives of assessment are to:
- ensure that assessment is criterion-related, transparent, and consistently applied across all subjects
- support student learning through the integration of formative and summative assessment practices
- provide timely, constructive, and actionable feedback to guide student progress
- maintain standardization and reliability in assessment through internal collaboration and alignment with IB requirements
- use assessment data to inform teaching, learning, and curriculum planning
- promote academic integrity and responsible learner behaviour
- enable students to reflect on their learning and take ownership of their progress
- communicate student achievement clearly and effectively to students, parents, and stakeholders
- ensure fair and transparent procedures for addressing assessment-related concerns, appeals, or challenges

Assessment: Principles

Assessment in the International Baccalaureate Diploma Programme is guided by principles of fairness, transparency, and consistency. It is criterion-related, measuring student achievement against clearly defined standards, and is designed to be valid and reliable.

Assessment ensures equity for all learners, supports academic integrity, and promotes student responsibility and reflection. All assessments are clearly communicated and regularly reviewed to ensure alignment with IB requirements and to maintain its fairness and credibility.

Special Features of Assessment in the Diploma Programme

Assessment in the International Baccalaureate Diploma Programme combines internal and external assessment, ensuring both continuous evaluation and international standardization. It is criterion-related and subject-specific, focusing on higher-order thinking skills.

A variety of assessment methods is used, including examinations, coursework, and oral or practical tasks. The programme also includes core components—Theory of Knowledge (TOK), the Extended Essay (EE), and Creativity, Activity, Service (CAS) which support holistic student development.

All assessments are subject to IB moderation, ensuring fairness and global consistency.

Assessment Practices

Pre-Assessment

- Teachers evaluate students' prior knowledge and experience before starting a new unit to inform teaching strategies.

Formative Assessment (Assessment for Learning)

- Ongoing assessment informs teachers and students about progress.
- Students engage in self-assessment, peer-assessment, and reflection to improve learning.
- Examples include draft assignments, presentations, discussions, quizzes, and visual representations.

Summative Assessment (Assessment of Learning)

- Conducted at the end of a unit or learning experience to evaluate mastery.
- Tasks include tests, essays, lab reports, projects, and oral/visual presentations.
- Graded against IB criteria and contribute to final grades.

Frequency of Formative and Summative Assessment

Formative Assessment

- Conducted regularly, often daily or weekly, to monitor student learning and inform teaching.
- Helps students, teachers, and parents identify strengths, address gaps, and adjust learning strategies.
- Examples include quizzes, discussions, draft assignments, and oral presentations.

Summative Assessment

- Conducted at the end of a unit, semester, or course to evaluate mastery of knowledge and skills.
- Provides formal evaluation of learning, contributing significantly to final grades.
- Examples include exams, essays, lab reports, projects, and presentations.

Key Difference

Formative	Summative
During learning	After learning
Assessment FOR learning	Assessment OF learning
Informal	Formal
Focus on process	Focus on product
Minor contribution to final grade	Major contribution to final grade

Both formative and summative assessments are planned strategically to support learning, provide feedback, and ensure fair evaluation in alignment with IB standards.

Self- and Peer-Assessment (Assessment as Learning)

- Students reflect on learning, set goals, and evaluate strengths and weaknesses.
- Peer assessment is guided by clear criteria, fostering critical thinking, communication, and collaboration.

Classroom Assessment

- Teachers develop rubrics, collect evidence of learning, document processes, and maintain records.
- Students reflect, communicate, and demonstrate learning using multiple approaches.

Assigning Homework as Assessment

- Reinforces classroom learning, supports reflection, and informs teachers and parents.
- Assignments are purposeful, aligned with classroom objectives, and clearly communicated.
- Students are responsible for understanding, completing, and managing assignments.

Internal and External Assessment

- **Internal Assessment (IA):** Teacher-marked, externally moderated; includes essays, projects, investigations, performances, and lab reports.
- **External Assessment (EA):** Externally marked exams or coursework, forming 60–80% of final grades.
- Each subject specifies IA and EA weightings in its syllabus.

Submission and Moderation

- Assessments are submitted by due dates; drafts provide checkpoints for feedback.
- Late submissions without extensions are graded for feedback only.
- IAs are moderated by IB examiners; EAs are externally assessed according to IB standards.

Assessment Environment and Strategies

For assessment to be effective, it must occur in an atmosphere of trust and cooperation between teachers and learners, both in the classroom and across the school community. A positive, supportive environment ensures that feedback is constructive rather than perceived as punitive and encourages open communication about areas for improvement.

Teachers at SGC employ a variety of assessment strategies to address diverse learning styles and needs, providing a balanced view of each student's understanding and allowing learners to demonstrate their grasp of curriculum concepts.

Key strategies include:

- **Observation:** Students are regularly observed individually, in groups, and as a whole class, including group dynamics and roles.
- **Task-Specific Rubrics:** Assessment criteria and expected outcomes are clearly communicated to students before tasks.
- **Internal Standardization:** Where multiple classes follow the same course, assessment standards are unified through common tests, shared marking schemes, and moderation of student work to ensure fairness and consistency across the department.

Criterion-Referenced Assessment

All assessment in the Diploma Programme is criterion-referenced, meaning student work is evaluated against clearly defined objectives rather than compared to peers. Assessment is designed to be high-stakes, reliable, and fair, supporting the curricular and philosophical goals of the programme, encouraging effective classroom practice, and promoting

meaningful student learning. It reflects the international-mindedness of the programme, avoids cultural bias, and accommodates students working in a second language. Assessment measures both higher-order cognitive skills (synthesis, reflection, evaluation, critical thinking) and foundational skills (knowledge, understanding, application), using a suitable range of tasks and instruments to ensure all subject objectives are addressed. Final grades are determined primarily through the professional judgment of experienced examiners, supported by statistical moderation, ensuring transparency, equity, and alignment with the rigorous standards of the Diploma Programme.

Submission of Student Work

All student work, including internal assessments, extended responses, investigations, projects, portfolios, and other coursework, must be submitted by the specified deadlines. Teachers provide checkpoints (e.g., drafts or progress reviews) to guide students and give feedback throughout the process.

Students are responsible for understanding the submission requirements, criteria, and deadlines, and for requesting clarification or support if needed.

Teachers monitor submissions, provide timely feedback, and ensure that all work aligns with IB standards and assessment criteria.

Notification of Assessment Tasks

All summative assessments must be clearly communicated to students in advance.

Notifications should include:

The content and key conceptual understandings being assessed.

The form of the task, such as an essay, report, presentation, oral, performance, or project.

The assessment criteria, including generic descriptors and any task-specific clarifications.

The due date of the task:

Summative assessments should be announced at least 14 days before the submission date.

For formative tasks, students should also receive clear information about expectations, including content, format, criteria, and deadlines, and are expected to record these in their homework diary.

This ensures that students have adequate preparation time and are fully aware of the requirements for all assessments.

Grading and Marking

The following analytical table shows the proportions between the Slovak Assessment System and the IB one. The table is useful for understanding the correlation of the two systems and switching to the IB System.

Comparison of grading systems

IB system	Grade	Slovak
Excellent	7	1 (excellent)
Very good	6	2 (laudable)
Good	5	3+(good)
Satisfactory	4	3 (satisfactory)
Mediocre	3	4+(pass)
Poor	2	4 (marginal pass)
Fail	1	5 (fail)

Final (reported) grade descriptions are as follows:

Grade 7: (Excellent) A consistent and thorough understanding of the required knowledge and skills, and the ability to apply them almost flawlessly in a wide variety of situations. There is consistent evidence of analysis, synthesis and evaluation where appropriate. The students consistently demonstrate originality and insight and always produce work of high quality.

Grade 6: (Very good) A consistent and thorough understanding of the required knowledge and skills, and the ability to apply them in a wide variety of situations. There is consistent evidence of analysis, synthesis and evaluation where appropriate. The students generally demonstrate originality and insight.

Grade 5: (Good) A consistent and thorough understanding of the required knowledge and skills, and ability to apply them in variety of situations. The students generally show evidence of analysis, synthesis and evaluation where appropriate and occasionally demonstrates originality and insight.

Grade 4: (Satisfactory) A good general understanding of the required knowledge and skills, and the ability to apply them effectively in normal situations. There is occasional evidence of the skills of analysis, synthesis and evaluation.

Grade 3: (Mediocre) Limited achievements against most of the objectives, or clear difficulties in some areas. The student demonstrates a limited understanding of the required knowledge and skills and is only able to apply them fully in normal situation with full support.

Grade 2: (Poor) Very limited achievements against all the objectives. The student has difficulty in understanding the required knowledge and skills, and is unable to apply them fully in normal situations, even with support.

Grade 1: (Very poor) Minimal achievements in terms of the objectives.

Higher level versus standard level courses

Awarding the same number of points for both HL and SL courses reflects the IB philosophy of the importance of achievement across a broad range of academic disciplines. HL and SL courses differ in scope but are assessed against the same grade descriptors, with HL candidates expected to demonstrate the various elements of the grade descriptors across a greater body of knowledge, understanding and skills.

The IB Diploma Additional Points Matrix (Core requirements)

The IB grades for Theory of Knowledge and the Extended Essay are as follows:

A	Excellent performance
B	Good performance
C	Satisfactory performance
D	Mediocre performance
E	Elementary performance (failing grade)
N	No grade

In order to achieve a final score for the Diploma, the numeric grades from the six subjects are added together.

EE and TOK grades are converted into 1, 2 or 3 points (using the matrix below) and added to the subject score to achieve a final result out of 45. 24 points (and the meeting of a number of conditions, see...) are required in order to 'pass' the Diploma.

TOK and EE are awarded individual grades and collectively can contribute up to three additional points towards the overall diploma score.

CAS does not contribute to the points total, but authenticated participation is a requirement for the award of the diploma.

The matrix for the assigning of the three inner core points is included here.

The Core Points Matrix

		THEORY OF KNOWLEDGE					
E X T E N D E D	E S S A Y		A	B	C	D	E
		A	3	3	2	2	1 + Fail
		B	3	2	1	1	Fail
		C	2	1	1	0	Fail
		D	2	1	0	0	Fail
		E	1 + Fail	Fail	Fail	Fail	Fail

A candidate who obtains an E in the EE or in ToK but achieves 28 points or more is allowed to pass the Diploma.

Recording and Reporting

IB Diploma Programme Section assessment practices emphasize regular formative feedback rather than a reliance on major tests and exams. A key element of this approach is providing learners with feedback in a variety of formats to support their progress. The school also ensures that this feedback is communicated at home, keeping parents informed. Parents are encouraged to maintain regular contact with teachers, either in person, via email or Managebac key chat, to further support their child's learning.

The school maintains a structured approach to communication with parents of DP candidates by organizing four official meetings throughout the academic year. These meetings are designed to provide comprehensive updates on student progress, assessment expectations, and key milestones within the Diploma Programme. During each session, parents are informed about internal and external assessment requirements, grading criteria, and strategies to support their child's academic success. Additionally, these meetings offer an opportunity for open dialogue, allowing parents to raise concerns, seek clarification, and collaborate with teachers and coordinators. This consistent engagement ensures transparency, fosters a supportive learning environment, and strengthens the partnership between the school and families in guiding students through the demands of the DP. Progress Reports are available twice a year, on 31st January and on 30th June.

Awarding Semester Grades

Full written academic reports are issued for all students at the end of each semester. Year 2 students, who sit final external examinations in April - May and therefore complete their studies earlier, receive their second semester report prior to these exams.

Semester and final grades represent the teacher's professional judgment of the extent to which each student has mastered the course requirements. The assessment methods used to determine these grades vary by subject and may include homework, quizzes, tests, laboratory reports, projects, essays, oral presentations, group work, and class participation.

The students will receive semester grades twice a year, in January and June.

Semester One

End of Term 1: All students receive an interim report indicating their progress.

End of Term 2: All students receive a full report.

Semester Two

Term 3: Final-year Diploma students receive a report following the IB mock examinations.

Term 4: All students receive a full report.

Progression from DP1 to DP2

If a student receives an end-of-DP1 grade of 1 or 2 in an IB subject, the school will meet with the student and their legal guardians to review the reasons for the result and agree on an individual improvement plan.

Depending on the student's overall performance and individual circumstances, the student may be offered the opportunity to repeat DP1 or to complete structured remedial work during the summer. The student may then complete a reassessment before or shortly after the beginning of DP2 to demonstrate improved knowledge and skills.

If the grade remains at 1 or 2, the student will normally progress to DP2 with enhanced academic support and regular progress monitoring. The student and their legal guardians will be clearly informed about the potential risk to the successful completion of the IB Diploma.

Progression to DP2 does not guarantee success in the final IB examinations or the award of the IB Diploma. The student's progress will be formally reviewed during DP2.

Award of the IB Diploma

Students receive grades ranging from 7 (highest) to 1 (lowest) for each Diploma Programme (DP) subject. The final diploma score is the sum of the grades from all six subjects. A maximum of 42 points can be achieved from subjects, with a minimum of 24 points required for the award of the diploma.

In addition, students may earn up to 3 bonus points from Theory of Knowledge (ToK) and the Extended Essay (EE), bringing the maximum possible total to 45 points: $(6 \times 7) + 3$.

The International Baccalaureate Organization (IBO) sets rigorous standards to ensure the integrity and consistency of the IB Diploma. The diploma is awarded only if all of the following conditions are met:

1. CAS requirements have been fulfilled.
2. The candidate has achieved a total of at least 24 points.
3. No grade "N" has been awarded for ToK, the Extended Essay, or any subject.
4. No grade E has been awarded for ToK or the Extended Essay.
5. No grade 1 has been awarded in any subject.
6. No more than two grade 2s have been awarded (HL or SL).
7. No more than three grade 3s have been awarded (HL or SL).
8. At least 12 points have been gained in Higher Level (HL) subjects (for candidates taking four HL subjects, the three highest grades count).
9. At least 9 points have been gained in Standard Level (SL) subjects (candidates taking two SL subjects must gain at least 5 points).
10. No penalty for academic misconduct has been issued by the Final Award Committee.

A bilingual diploma

A bilingual diploma is awarded to a successful candidate who fulfills one or both of the following criteria:

- Completion of two languages selected from Group 1, with a grade of 3 or higher in both.
- Completion of one subject from Group 3 or Group 4 in a language different from the candidate's nominated Group 1 language, with a grade of 3 or higher in both the Group 1 language and the subject concerned.
- Interdisciplinary and pilot subjects may contribute to the award of a bilingual diploma, provided the above conditions are met.

The following cannot contribute to the award of a bilingual diploma:

- A school-based syllabus
- A subject taken in addition to the six subjects required for the diploma

Assessments for Students with Special Educational Needs

Students with special educational needs are those who have the intellectual capacity to meet curriculum requirements but require tailored support to demonstrate their achievement. When standard assessment conditions may disadvantage such students, the IB may authorize special arrangements. This applies to students with learning difficulties, as well as those affected by temporary, long-term, or permanent disability or illness.

Special arrangements follow these principles:

- Grades must accurately reflect a student's attainment, applying the same standards to all candidates.
- Arrangements aim to reduce barriers, not provide an advantage.
- They are intended for students capable of meeting all assessment requirements for the diploma or course results.

Assessment accommodations or modifications are provided as specified in a student's Individual Education Plan (IEP) and may require IB approval for formal examinations. These accommodations should also be applied in classroom assessments to ensure consistency. Full details are outlined in the school's Inclusion Policy.

Responsibilities of Key Stakeholders

Given the central role of assessment, all members of the SGČ Diploma Programme community are expected to actively support student learning and help ensure that students achieve their academic goals.

Students

- Complete all assessments by the assigned deadlines.
- Produce work of high quality that reflects their best ability.
- Develop effective time management and study skills.
- Act with integrity and adhere to the SGČ Academic Integrity Policy.
- Build and maintain positive relationships with CAS and EE supervisors.
- Strive to demonstrate the attributes of the IB Learner Profile.
- Proactively seek help, monitor progress, and reflect on areas for improvement.
- Engage in meaningful self- and peer-assessment.

Teachers

- Ensure assessment tasks align with IBDP curricular goals.
- Clearly communicate assessment criteria for all assignments and subjects.
- Design formative assessments to guide student progress and understanding.
- Incorporate formative assessment results into daily planning.
- Provide timely written and verbal feedback systematically throughout the year.
- Share and discuss exemplars to illustrate different achievement levels.
- Follow the Internal Assessment Calendar and Assessment Outline deadlines.
- Submit required documentation (e.g., predicted grades, IAs) to the IB Coordinator on time.
- Maintain regular communication with students, parents, and the DP Coordinator regarding student progress.
- Collaborate with colleagues to evaluate instructional strategies and student outcomes.
- Use varied instructional and assessment strategies to differentiate learning.
- Stay current with curriculum and assessment updates via the IB Programme Resource Centre (PCR).

Parents/Guardians

- Monitor student progress through the reporting system and communication with teachers.
- Discuss assignments and assessments with students to support achievement.
- Contact teachers promptly with questions or concerns to resolve issues effectively.
- Attend all scheduled parent meetings.

DP Coordinator

- Distribute IB assessment materials and relevant documents to teachers.
- Organize IB training for new teachers and ongoing professional development when curricula change.
- Arrange teacher collaboration meetings to plan and reflect on teaching and assessment.
- Register students for IB examinations and manage all related deadlines.
- Supervise IB examinations and monitor testing conditions.

- Oversee the Extended Essay and CAS processes.
- Promote a culture of assessment for learning and assessment of learning.
- Review the Assessment Policy annually with staff.

Predicted Grades

The Predicted Grade is the teacher's professional judgment of the grade a candidate is expected to achieve in a subject, based on all available evidence of the student's work and the IB guidelines and standards.

Predicted Grades may be used:

- By universities to evaluate applicants and make conditional offers.
- By the IB to review student work if the final awarded grade differs significantly from the predicted grade.

A student's Predicted Grade is determined using Internal Assessments (IA), end-of-semester exams, and the February mock examination. All Predicted Grades are submitted to the DP Coordinator by the end of the first week of March.

Communication of Assessment Policies

Assessment policies are communicated clearly to all members of the Diploma Programme community. Students and parents receive information through orientations, handbooks, official reports, and meetings. Teachers provide guidance on assessment criteria and expectations in each subject, and the DP Coordinator ensures that updates, IB requirements, and policy changes are shared with staff, students, and parents regularly. This ensures transparency, fosters understanding of assessment practices, and supports student success.

Students and parents are informed of IB assessment criteria through:

- Teachers' syllabuses
- Classroom instruction
- Guidance meetings with students and/or parents
- Individual meetings with students and parents
- The school website/Managebac

Connections to Other Policies

This policy should be read together with the Academic Integrity Policy, which governs authentic work and misconduct; the Inclusion Policy, which governs inclusive access arrangements; and the Language Policy, which guides support for multilingual learners and the language demands of assessment. The Admissions Policy provides the entry and placement context relevant to assessment support.

Policy Review

This policy is reviewed annually and revised when required by changes in IB requirements, legislation or the school context. A comprehensive review is conducted as part of the five-year programme-evaluation cycle.

Acknowledgment
